

PORTABLE Q-CATCH® 74 SERIES

CHUTE, ALLEY & TUB

 **ARROWQUIP**

WHY ARROWQUIP?

The 400 Series cattle chutes were created to provide practical ranchers with straightforward cattle handling solutions that do not compromise safety and quality for affordability. Unlike anything else in the market, Arrowquip's economical chute lineup gives ranchers the opportunity to step up their operation using equipment designed with precision engineering and animal science.

PRODUCT CODE: 7408

WEIGHT: 4167 lbs.

WORKING DIMENSIONS: 93" w x 96" h x 404" l (When set up.)

TOWING DIMENSIONS: 81" w x 106" h x 354" l (With wheels and hitch.)

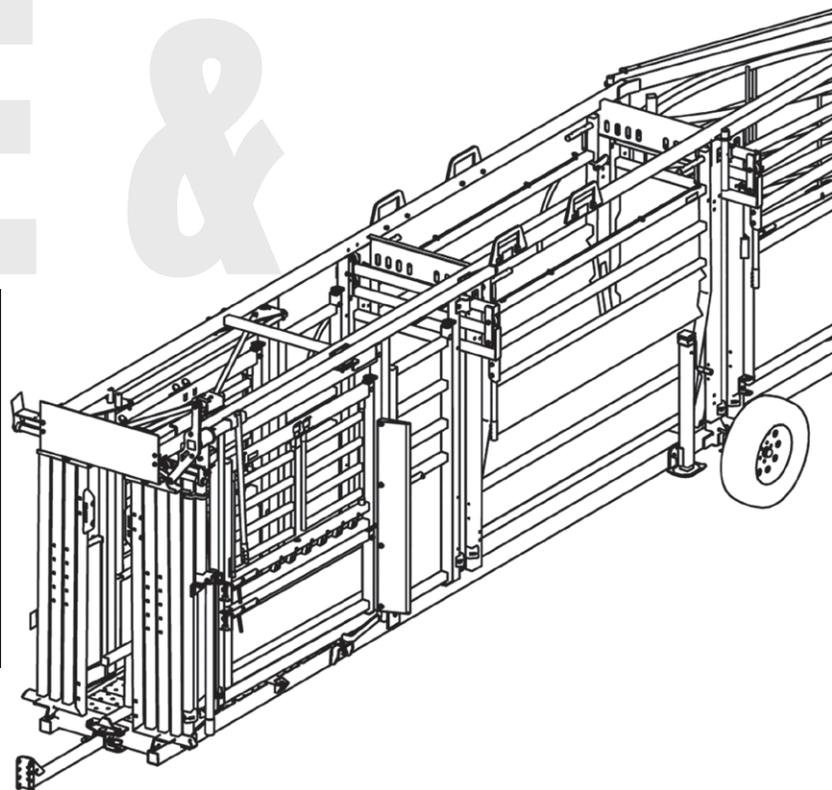

THE MOST COMPACT HANDLING SYSTEM EVER

The Q-Catch 74 Series Portable Chute, Alley and Tub is designed for safe and efficient cattle handling anytime, anywhere. Featuring the new Q-Catch 74 Series cattle chute, together with an 8' Easy Flow Adjustable Alley section and a redesigned 8' Crowding Tub, this portable handling system is everything you need to step up your operation. When setting up only takes a matter of minutes, the Q-Catch 74 Series Portable Chute, Alley and Tub greatly boosts productivity no matter where you take it.

PRODUCT WARRANTY

- Portable unit - **1 YEAR**
- Patented head gate friction locks – **LIFETIME**
- Patented squeeze friction locks – **LIFETIME**
- Rump fingers – **LIFETIME**

Products must be registered to claim warranty. Contact your Authorized Arrowquip Dealer for more information.

3E Q-CATCH HEAD GATE [PATENTED]

- Uses light to draw cattle into the chute
- **NEW** barred style allows cattle to see light past the head gate
- Patented locking mechanism features infinite adjustments
- Self-lubricating head gate rollers are maintenance-free
- Opens to a full 30" top to bottom
- Single lever push-to-close, pull-to-open operation never requires adjustments

HEAD GATE OPERATION HANDLE

- User-friendly handle that reduces operator's fatigue
- Handle can be situated anywhere along the side of the chute

NEW DIRECT DRIVE SYSTEM [PATENT-PENDING]

- Enhanced design provides a direct connection from the control tube to the head gate
 - Provides instant head gate response time
 - Head gate operation can be easily converted* to the opposite side
- *Requires additional parts. See product manual.

REMOVABLE AND CONFIGURABLE IN 7 WAYS

RUMP FINGERS

- Nylon rump fingers designed to endure high pressure
- Includes a heavy-duty rubber-coated fiberglass rump bar that is light and slip-resistant

NEEDLE ACCESS [PATENT-PENDING]

- **NEW** drop-down needle bar allows for quick access to the neck
- Completely removable panel

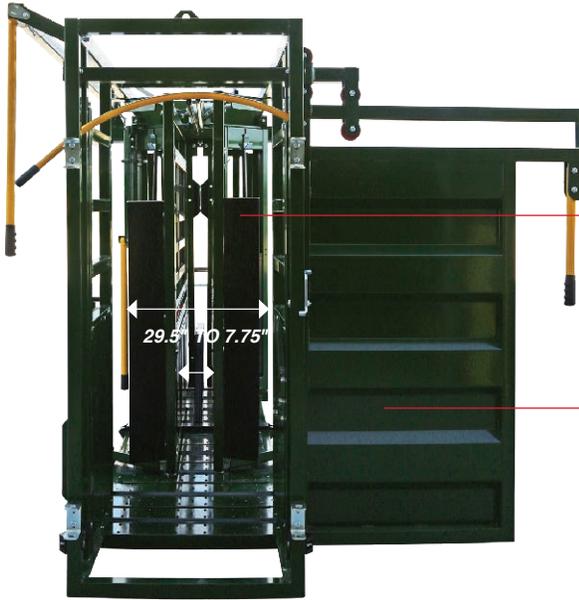

FLOORING [PATENT-PENDING]

- Made with industry-grade American steel
- Designed with slots for drainage and easy cleaning
- Secured with stainless steel structural rivets used in aircrafts

METAL-STAMPED RIBBED FLOOR FOR TRACTION

12.75" NEEDLE GATE ACCESS TOP TO BOTTOM

CAN BE USED INDEPENDENTLY OR TOGETHER

SQUEEZE

- Single lever push-pull operation
- Designed to work with cattle of any size
- Patented squeeze mechanism never requires adjustments

ROLLING ALLEY GATES

- Reversible offside & onside operation
- Top-mounted to eliminate the issue of build-up
- Reversible offside & onside operation

VET DOOR

- Improved slam latch ensures the door won't swing through when slammed shut

SWINGS 180° IN & OUT

PANELS CAN
DROP DOWN IN
EMERGENCIES

EASY FLOW ALLEY

- Cradle-shaped alley prevents cattle of any size from turning around
- **NEW** removable panels for varied sheet height options
- Scale platform compatible
- Narrows down the middle to work with the parallel squeeze
- Both side panels on the alley can be adjusted from one side with connection cables
- Safety latches on the side panels add security when adjusting
- Spring-loaded locking system allows for easy adjustments

COLLAPSIBLE TUB

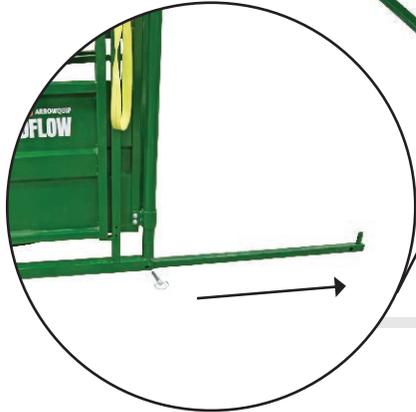

- 8' radius crowding tub
- No assembly required
- Quick and easy set up

CAN BE USED AS
A CROWD GATE

NO TRIPPING
HAZARDS

FOLDS IN ITSELF FOR
COMPACT TOWING

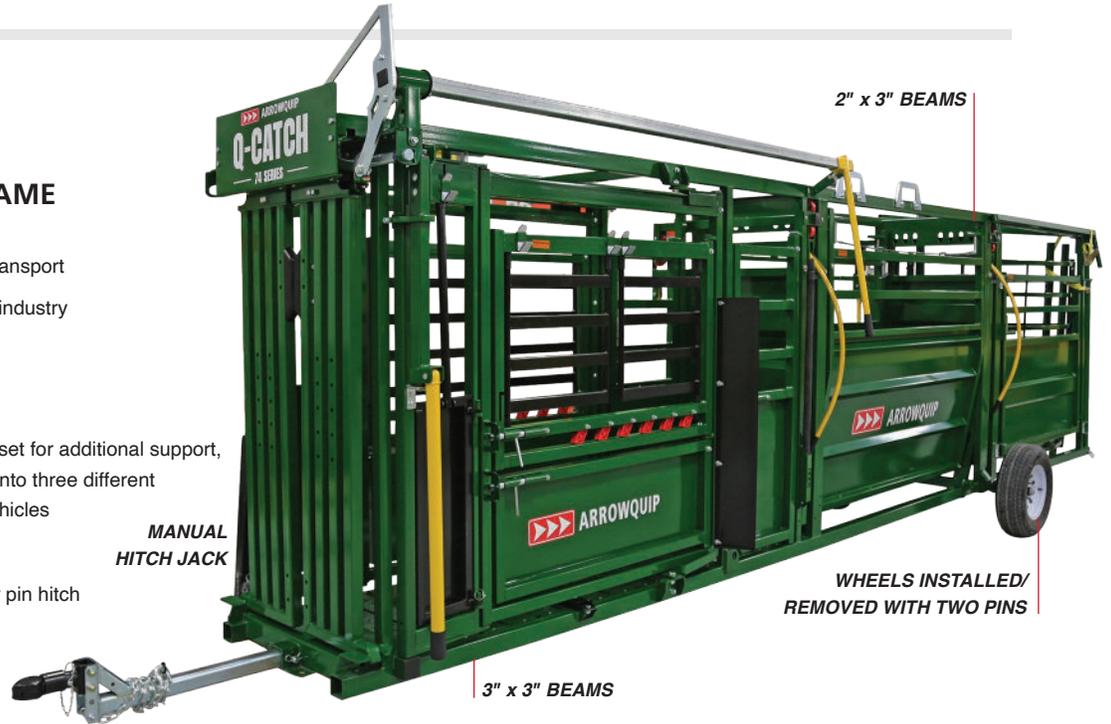

PORTABLE SYSTEM FRAME [PATENT-PENDING]

- Engineered for durability during transport
- Most compact towing units in the industry
- Simple set-up and takedown

TRANSPORTATION

- Improved hitch has an added gusset for additional support, and the bracket can be adjusted into three different positions to work with different vehicles
- Simple set-up and take-down
- Available with 2 5/16" ball hitch or pin hitch

TOWING VS WORKING DIMENSIONS

ADD-ONS

NEW 3RD GENERATION HEAD HOLDER [PATENTED]

The head holder is a sturdy mechanism that clamps around the animal's neck and holds the head immobile. The head holder features single-lever push pull operation, and simplifies any procedure requiring access to the animal's head. The **NEW** 3rd generation head holder is more heavy-duty than previous models, and features new mechanical connections.

NEW TRIMMING BAR

The trimming bar provides added safety when clipping cattle. You can adjust the position and angle of the bar along the side of the chute to suit your needs.

NEW CHIN BAR

The chin bar is a simple add-on that raises the chin when access to the head is needed.

NEW ADDITIONAL REMOVABLE SIDE PANELS

These panels can be used to raise the sheet height of your alley to further control what cattle see. Eliminating distractions can greatly improve the efficiency of cattle flow through your system.

NEW STERNUM BAR

The sternum bar prevents cattle from going down in the chute. The improved design is sheeted to prevent hoof traps, and is easily installed or removed with 2 bolts.

ANTI-BACKING BAR

An add-on you can install in an alley section to prevent cattle from backing up and disrupting the flow.

Arrowquip was founded in 1988 by the Firth family in Australia with the mission "To influence the livestock handling industry globally through the practical application of animal science and welfare standards, and increase producer safety and profitability with innovative equipment". This inspiration came while working cattle on their family ranch in Australia, due to the challenges they encountered with the lack of quality livestock handling solutions available to ranchers. As a forward-thinking family, they began to develop solutions to fill this gap in the market, and have been providing the high-quality livestock handling equipment producers are seeking ever since.

Arrowquip is the only manufacturer to employ a full-time team of engineers dedicated specifically to cattle handling in our industry. Every

piece of equipment we develop undergoes an extensive development period in which our R&D Team exhausts every possible avenue to make our equipment the best it can be for the handler to work their livestock. As a result, our equipment is recognized worldwide as the most innovative and thoughtfully designed livestock equipment in the market today.

In the last 30 years, Arrowquip has become a world-renowned manufacturer of cattle handling solutions known for their innovative designs, technological advancements, investment in animal science, and forward-thinking equipment. Our years of research, equipment development process, extensive testing periods, and the refusal to settle for "good enough" have set a new precedent within the livestock handling industry.
